Engineering excellence in delivering communication solutions for over 20 years

## One provider from conception to completion

Our in house, highly skilled team design, troubleshoot, terminate, splice and test a wide range of fibre optic applications from conventional to blown optical fibre.

With over 20 years' experience our dedicated engineers have a vast understanding of delivering reliable, fit for purpose communication solutions to our client base.

## Confidence in our experience

We grow client confidence through our ability to react to faults and our appetite to solve problems. We always work safely and transparently to increase your system uptime.

We have enhanced our fibre optic reputation both within the UK and overseas due to our proven ability, core competencies and standing as a leading industrial network specialist.

## Benefit from our breadth of industrial knowledge

As a true systems Integrator, Boulting Technology provide both unbiased and unprecedented knowledge of optical fibre solutions across all industries.

We specifically add value through early engagement with our clients to deliver network strategy, systems assessment, migration planning, design, implementation and project management to transform networks irrespective of environment and application.

Boulting Technology, a strategic business of Boulting Ltd, are the UK's leading supplier of Systems Integration, LV Assemblies, Telemetry and Industrial Networks. Partnering with leading vendors including:

Boulting Ltd, Boulting House, Firecrest Court, Centre Park, Warrington WA1 1RG

Engineering excellence in delivering communication solutions for over 20 years

## Cabling consultancy for a tailored solution

We understand that your business depends on efficient, fast and reliable communication solutions for your network.

Our depth and breadth of knowledge on the application of tailored fibre optic solutions makes Boulting Technology unique.

By understanding our clients' systems and primary needs, whether IT, OT or a converged environment, our ability to offer independent advice and experience makes the difference.

As cabling systems becomes larger and the need to transmit data securely at ever increasing rates becomes greater, the case for fibre optic cabling becomes more relevant.

Whether it is used as a vertical back bone or to link buildings across a campus, fibre optic cabling offers a secure, robust, resilient and cost effective solution.

## Trusted experts

Our clients trust our knowledge and expertise for consistent delivery of high quality service and products. With a track record of project completion within budget and timeframe with minimum disruption, you can be confident in our delivery.

## Boulting Technology Fibre Optic Cabling installation portfolio

- Multi-Mode cables (OM1, OM2, OM3 and OM4)
- Single mode cables (OS1 and OS2)
- Tight buffered and Loose Tube constructions
- Pre-Terminated solutions
- Internal, External and Universal sheath options
- Plastic Optical Fibres (POF)
- Rodent resistant CSTA and steel wire armoured bales for harsh environments
- Fibre to the desk (FTTD)
- ST, SC, MT-RJ, LC terminations
- Blown Fibre solutions
- Tier-1 Optical Testing (ILM)
- Tier-2 Optical Testing (OTDR)
- Bi-Directional, dual wavelength testing
- Pre-Installation / Post-Installation testing
- Optical performance testing
- Dark fibre certification

To find out more about why our clients come back to us time and time again, contact us today.
