Managed Services

Firewall management can be a time consuming and challenging activity which requires high level of technical expertise to prevent security breaches and unauthorised access. Firewalls must be configured, managed and maintained to keep up to date with threats from a number of sources.

Boulting/NETbuilder provide a Managed Firewall Service where we take the hassle of managing the firewall out of your hands, thereby freeing up engineering resources and allowing your IT engineers to focus on operational activities.

Contact us for more details or to arrange a call to discuss your requirements.

We can provide Managed Firewall Services for firewalls from a number of vendors including Cisco, WatchGuard and SonicWall.

Key benefits of the Managed Firewall Service include:

- Access to Service Desk between 8am and 5.30pm Monday to Friday
- Proactive monitoring of the internet connection and the firewall/UTM appliance
- Annual vulnerability assessment of public facing IP addresses protected by the firewall/UTM appliance
- Annual firewall rule health check
- Scheduled secure backup of the firewall/UTM application configuration
- Remote firewall/UTM appliance updates
- Change management with defined SLAs

▪ Enabling end to end digitalisation ▪
