Peace of Mind

When you rely on your plant control systems to operate 24 hours a day, 365 days a year any failure can result in a significant impact on your performance and operating costs.

Undertaking a comprehensive survey of your systems identifies improvements that will address potential failures and improve your uptime. We'll give you peace of mind to maximise efficiency and reduce costs

We are Control System Experts

As industry leading control system specialists we can deliver a control systems Health Check. You will be in safe hands, secure in the comprehensive knowledge of our experienced professionals. As an approved integrator for leading OEMs such as Siemens, Rockwell, ABB and Mitsubishi, we have the in-depth technical know-how. We can also call on their extensive resources to provide you with the most appropriate, tailored solutions.

Our Expertise Deliver So Much More

Boulting don't stop there. We provide cost-effective solutions that directly address downtime issues whilst at the same time future proofing your equipment, enabling your business to navigate the intricacies of Industry 4.0.

Our 'BRISK' control system Health Check is a great way to establish the efficiency of your control systems and support arrangements. It will result in a priority list of actions that will have an immediate impact on reliability.
